Acknowledgments

Sincere appreciation is expressed to the many individuals who spent considerable time and energy working on the development of this report. Special thanks are given to the staff members of the Division of Community Epidemiology, County of San Diego Health and Human Services Agency, who spent many hours analyzing data and preparing data tables. Additionally, thanks are extended to Peggy Browneller and Christie Merrill for report editing and layout.

The Needs Assessment Committee, under the direction of the Steering Committee, began planning this Assessment in late 2000. Much thought was put into creating a document that would be both useful and enlightening to health care organizations, community-based health and social services organizations, and the community in general. Gratitude is expressed to all of the Committee members and, in particular, to the Committee's Co-chairs, Dr. Ruth Covell and Cheri Fidler.

Additional appreciation is given to the CHIP Executive Partners—the leaders of health-related organizations—who generously supported this project, and to their designated representatives on the CHIP Steering Committee for their continued input and support of this report.

Charting the Course III was funded by the SB 697 hospitals of the Healthcare Association of San Diego and Imperial Counties and the Community Health Improvement Partners.
