Deaths are for males only. All rates are per 100,000 male population and are adjusted to 2000 Standard U.S. Population.

* No rates calculated for fewer than 5 events.

Note: Rates based on fewer than 20 events should be interpreted with caution.

*Note: The 1999 mortality data is the first release to use ICD-10 to code underlying cause of death and differs from the ICD-9 classification used for the 1995-1998 data. Due to lack of comparability between the two ICD versions, the differences in deaths and rates between pre-1999 and 1999 may result in major discontinuities in trend data.
