\* Duplicate referrals for the same child were removed from the county and state counts, however children with referrals in more than one county will appear in the table for each referral county, thus, the sum of children in each county will add to more than the total for the state.

\* Particulate matter less than 10 microns.

\*\* The estimated individual risk of getting cancer due to a lifetime exposure to outdoor hazardous air pollutants. The Clean Air Act's goal is to reduce lifetime cancer risks from hazardous air pollutants to one in one million, thus an added risk of 550 per million is 550 times higher than the Act's goal.

Source: California Air Resources Board, added cancer risk data from Environmental Defense

# COLLISIONS PER MILE OF TRAVEL ON COUNTY ROADS

*Miles of road, miles of travel and collisions, 2000*
