Notes:

- Preterm births are births that occur prior to 37 complete weeks of gestation.
 - Births with unknown or improbable gestation lengths were excluded from analyses (improbable lengths are those that likely reflect inaccuracies rather than actual gestation periods (under 17 complete weeks or 53 or more complete weeks)).
 - The increasing number of births with unknown race/ethnicity affects the accuracy of statistics by race/ethnicity.
 - The large proportion of births with unknown educational attainment affects the accuracy of statistics by educational attainment.
- *Rates not calculated for fewer than 5 events; interpret with caution rates calculated for fewer than 20 events since they are considered statistically unreliable.
