HELP US STOP METH MAKERS

COLD REMEDIES

Meth makers need ephedrine to make meth.

Common cold pills containing ephedrine or pseudoephedrine like allergy, cough, cold, sinus and asthma medications.

This is why San Diego County and California State law restrict the sale of these items in large quantities.

QUANTITIES & COMBINATIONS

Purchased individually, these common household items found on your store shelves do not indicate this person is making meth. However, if anyone is buying large quantities or buying in combinations any of these products, they may be involved in the manufacturing of methamphetamine.

If you suspect someone of methamphetamine manufacturing, please contact your manager and call the Meth Hotline using the guidelines on the back of this brochure. 1• 877• No2Meth (toll free) 1-877-662-6384

CHEMICALS & SOLVENTS

Become familiar with these items, the quantities, and combinations that may be purchased.

HELP US STOP METH MAKERS

If you feel you have witnessed a suspicious action such as described here, report it using these guidelines:

1. Call 1-877-No2Meth (toll free) 1-877-662-6384. All the information provided will be confidential.
2. Tell the operator what store you're with and ask to speak to someone about "Operation No-2-Meth".
3. Tell them you just had an incident where a customer purchased or attempted to purchase several of the items as detailed inside this brochure. Be specific.
4. Provide a description of the person including whether they're male or female, approximate age, weight, height and what type of vehicle they were driving, including a license plate number if available.

CAUTION:

Do not attempt to stop or apprehend anyone on your own.
