

2005-2006 Flu Immunization Information

The following priority groups are eligible for flu vaccine at County Health facilities, subject to vaccine availability:

- **persons aged 60 years and older, with or without chronic health conditions**
- **residents of long-term care facilities**
- **persons aged 2–64 years with chronic health conditions**
- **children aged 6–23 months**
- **pregnant women**
- **health-care personnel who provide direct patient care**
- **household contacts and out-of-home caregivers of children aged <6 months**
- **household contacts of persons at high risk for complications from the flu**

Please note that vaccination with the live, nasal-spray flu vaccine (FluMist®) is always an option for healthy persons aged 5-49 years who are not pregnant. These persons would not be eligible for flu shots at County Health facilities. This vaccine is not subject to prioritization and can be given to healthy, non-pregnant 5-49 year olds at any time. Some Community Clinics and private clinics may have it available.

For additional clinic sites, and for persons who are not eligible to receive flu vaccine in public clinics because they are not in the high-risk groups, please call Aging and Independence Services at 1-877-358-0202 for a referral.

Flu shots will be available throughout the flu season while vaccine supplies are still available. The pneumococcal pneumonia and tetanus-diphtheria (Td) vaccines can also be obtained at these clinics and any time of year if medically appropriate.

There is a \$10 fee for the immunization visit, which may be waived if you are unable to pay. Medicare (Part B) will be accepted for the flu shot and pneumococcal vaccine.

Subject to vaccine availability, flu vaccine is being offered to eligible persons at the following locations:

Central Region (East San Diego) Public Health Center - 5202 University Ave., San Diego
