

New Edgemoor – Getting Ready For Steel

There have been some delays due to problems with the steel. Some steel is on site and the crew has already started work on the frame. Hopefully, we will have pictures of the frame in progress with the beginning of the new year. Work on the surrounding areas progresses and as you can see, Park Center Drive is almost ready to become a real street!

New Edgemoor – Wet Weather Sets In

The first of the winter weather is taking its toll on the time schedule as concrete has to be delayed because of wet conditions. Three cheers for the construction workers who brave the mud to continue work on the pipelines and storm drains!

New Edgemoor – We Have Concrete!

The first concrete for the foundation was poured in September. Plumbing, water and utility lines have been placed. We can see the footprint of the building starting to take shape.

New Edgemoor – August Update

Work progresses through the good summer weather with Park Center Drive and the foundation continuing to take shape.
