

New Edgemoor – HAPPY NEW YEAR 2008!

It's been sometime since we have posted updated photos of the new facility. Construction really got going full force in 2007 and we can now get a good idea of what the building will look like. The interior framing is finished and waiting for the dry wall. The parking lot has been paved and the exterior is shaping up nicely. Here are a few photos to give you an idea.....

This is an Interior hallway with framing in one of the patient "neighborhoods".

The facility is built around four interior courtyards. This is a view of one of the interior courtyards from the second floor.

This is the parking lot from the side of the building. The parking lot wraps around the front. The wall shown here is along the entry walkway leading to the front door.

The loading dock is taking shape. Every truck coming to the facility will make their deliveries here.

Exterior view of both floors and the roof.
