* Classification at time of AIDS dx if patient met the AIDS case definition (otherwise age at first HIV report).

** HIV first became reportable July 1, 2002, using a non-name code. This system has changed. SB 699 was signed into law on April 17, 2006 requiring names-based HIV reporting. This summary report and future HIV Surveillance Reports will reflect only HIV cases reported under the provisions of SB 699. Caution should be taken in interpreting these data at this time.
