

HIV Testing* in the East HHSA Region

Gender

Free anonymous HIV testing is available to interested individuals at more than 10 sites throughout San Diego County. Between the year 2003 and 2007, 2786 tests were taken by residents (some were likely repeat tests) of the East Region, and of these, 33 were HIV positive. The rate of HIV infection was lower for males in the East region than the County overall in the same time period. Where there are fewer than 5 HIV positive tests per year (or 25 HIV positive tests in this time period), rates are not calculated.

East Region, 2003-2007

Mode of Transmission

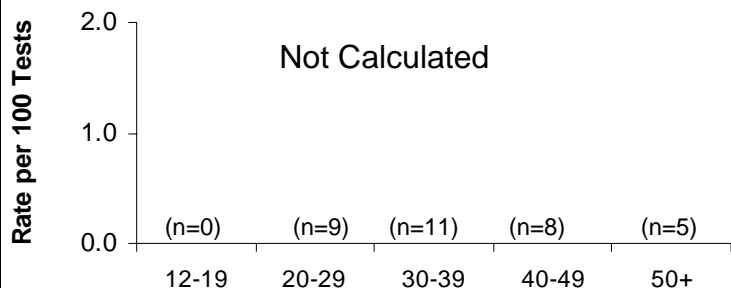

No rates could be calculated due to fewer than 5 HIV positive tests per year (or 25 HIV positive tests in this time period) for each group.

Racial/Ethnic Group

No rates could be calculated due to fewer than 5 HIV positive tests per year (or 25 HIV positive tests in this time period) for each group.

East Region, 2003-2007

Age at Diagnosis

No rates could be calculated due to fewer than 5 HIV positive tests per year (or 25 HIV positive tests in this time period) for each group.

*Notes: Data for HIV testing from free public anonymous testing at HIV Counseling and Testing sites in San Diego County, 2003-2007. Each test does not necessarily represent a unique individual (repeat testers). For more information call Community Epidemiology at (619) 515-6675 or log on to www.sdhivaid.org
