White	80	16,902	4.7	80	16,425	4.9	66	16,142	4.1

Notes: Rates are number of deaths of infants under one year of age per 1,000 live births. Starting year 2000, birth and death certificates allowed reporting of up to three races. Persons who reported more than one race were placed in the "Two or more races" category. Therefore, these race categories are not comparable to pre-2000 categories. Statistics by race/ethnicity should be interpreted with caution as misreporting of some race/ethnicities may occur on death certificates. Infants with unknown region or race/ethnicity are not included/shown in these respective categories.

*Rate not calculated for fewer than 5 events in this category.

35 and up	163	2.3	163	2.3	126	1.7	100	1.3

Notes: Starting year 2000, birth certificates allowed reporting of up to three races. Persons who reported more than one race were placed in the "Two or more races" category. Therefore, these race categories are not comparable to pre-2000 categories. Late prenatal care is care beginning in the 3rd trimester. Births with unknown prenatal care status were excluded from the denominator in rate calculations; comparisons should only be made with similarly calculated rates. Births in which the mother's region, race/ethnicity or age are unknown are not included/shown in these respective categories.

*Rate not calculated for fewer than 5 events in this category.
