¹ Mortality data for specific causes cannot be compared to prior year data due to change from ICD 9 to ICD 10. Therefore, three year averages are not reflected except for 'All Causes'.

² Age-adjusted rates cannot be compared to prior year data due to change from 1940 to 2000 standard million population.

Note: Crude death rates, crude case rates, and age-adjusted death rates are per 100,000 population. Birth cohort infant death rates are per 1,000 live births. Age-specific birth rates are per 1,000 population.
