Rates calculated per 100,000 population.

No rates calculated for fewer than 5 events.

^α Overall may be greater than the sum of cases in Age Groups because deaths in which age could not be determined are included.

Age adjusted rates calculated using the 1940 standard million population.

¹Age adjusted.

²HP 2000 (9.4): "Reduce deaths from falls and fall-related injuries to no more than 2.3 per 100,000 people."

³Ages 65-84.
