Data Source: California Department of Public Health, Center for Family Health, Genetic Disease Screening Program, Newborn Screening Data, 2006

Prepared by: California Department of Public Health, Center for Family Health, Maternal, Child and Adolescent Health Program

Note 1: All nonmilitary hospitals are required to complete the Newborn Screening Test Form (DHS 4409) prior to an infant's discharge.

Upon completing the form, staff must select one of the following five categories to describe 'all feedings since birth' (not including water feedings):

(1) Breast only; (2) Formula only; (3) Breast and Formula; (4) TPN/Hyperal and (5) Other.

Note 2: The numerator for "Exclusive Breastfeeding" includes records marked 'Breast Only'. The numerator for "Any Breastfeeding" includes records marked as either 'Breast Only' or 'Breast and Formula'. The denominator excludes cases with unknown method of feeding and cases marked as TPN/Hyperal or Other. Statewide approximately 5.1% of cases have missing feeding information, 1.2% are coded as TPN/Hyperal and 1.3% are coded as Other.

Note 3: Infant race/ethnicity is based upon mother and father race/ethnicity as reported on the birth certificate and recorded on the Newborn Screening Test Form.

Note 4: Data shown for facilities listed as 'Kaiser', 'Military', 'Pediatric', and 'Regular Maternity' in the newborn screening database.

Note 5: Facility and county of occurrence data are missing for 2.5% of cases, but are included in the state total.

Note 6: Counties and facilities with fewer than 50 births with known type of feeding are not shown. Data for counties shown in this table include information for all births occurring in that county.

Note 7: Numbers are not shown for fewer than 10 events. Exact percent data are not shown for overall hospital level data with fewer than 10 events in the numerator.

Note 8: Percents are not calculated for race/ethnic groups with fewer than 20 events in the numerator.

Note 9: Data for cases with missing race/ethnicity are not shown, but are included in the totals.

Note 10: 95% confidence intervals are shown in parentheses. Confidence intervals were computed using the Wilson Score formula.

Newcombe, R.G. (1998). Two-sided confidence intervals for the single proportion: comparison of seven methods. *Statistics in Medicine*, 17: 857-872.
