¹ The race and ethnic groups in this table utilize nine mutually exclusive race and ethnicity categories. These categories are Hispanic and the following Non-Hispanic categories of Two or More Races, American Indian (includes Eskimo and Aleut), Asian, Black, Pacific Islander (includes Hawaiian), White, Other Race, and Unknown (includes refused to state). These groups are not comparable with race groups used in Vital Statistics of California reports prior to 2000.

² Includes unknown race/ethnicity

a Rates not calculated for fewer than five events.

b Rates not calculated for fewer than 1,000 births.

Note: Neonatal deaths are deaths under 28 days of age.

Early neonatal deaths are those occurring during the first six days of life.

Late neonatal deaths are those occurring between the seventh and the 27th day of life.

Postneonatal deaths are deaths occurring on the 28th day and up to one year of age.

Infant deaths are under one year of age.

Early and late neonatal, postneonatal, and infant death rates are per 1,000 live births.

Death rates based on small numbers are highly unreliable.

Rates are not shown for unknown categories.
