<sup>1</sup> American Indian, Asian/Pacific Islander, Black, and White exclude Hispanic. American Indian includes Eskimo and Aleut. Hispanic includes any race category. White includes Other Races, Not Stated, and Unknown Race.

<sup>2</sup> The general fertility rate is the total number of live births per 1,000 women of childbearing ages (15-44).

<sup>3</sup> The total fertility rate is the sum of each age-specific live birth rate multiplied by the number of years in the age group.

<sup>4</sup> The birth rate by age is the number of live births per 1,000 women in a specific age group. For women under 15, the rate is calculated using the female population 10-14 years of age, and for women over 44, using the female population 45-49 years of age.

a Rates are not calculated for fewer than 5 events.
