Note : Rates are per 100,000 population. ICD-10 codes U01-U02, X85-Y09, Y87.1.

The year 2000 U.S. standard population is used for age-adjusted rates.

a Represents a percentage of more than zero but less than 0.05.

1 County age-adjusted rate is significantly different from California age-adjusted rate.

2 Met or surpassed the Healthy People 2010 homicide target 15-32, an age-adjusted rate of no more than 2.8 homicide deaths per 100,000 population.

* Death rate unreliable, relative standard error is greater than or equal to 23 percent.

+ Standard error indeterminate, death rate based on no (zero) deaths.

- Confidence limit is not calculated for no (zero) deaths.
